Infant Water Acclimation

Join us in creating safer environments by getting your child acclimated to water through the world of exploring and playing.

This class will help your infants 6-12 months get use to the wonderful sensation of water and help them to remain calm in a pool. The instructor will help both parent and infant develop water safety skills. Parents will be in the water with their children to assist them with water exploration and sensitivity.

Classes will be Thursday 5:15-5:45pm

July 25th-August 15th

Member\$40 Non-member \$60

Registration:
